

Board Policy - 5000

Personnel

Board Goals/Personnel

The human resources of the District are valuable and significant in creating an effective educational program and learning environment. Schools function most efficiently and successfully when highly qualified individuals are employed to staff the needs of the District. Opportunities for staff development should be provided. Supervision is a necessary, ongoing function of the District's leadership. The board seeks to promote an efficient and positive school climate in all educational endeavors, in order that students may work toward their greatest potential, and the community will be proud of its investment.
