Housing Assistance Program

As the value of residential property in the McCall-Donnelly School District fluctuates, the Board may create programs to assist new and current employees in their effort to procure adequate housing.

There shall be no entitlement to participation in such a program, no obligation to provide or expand the program, and no expectation that the program will continue for a specific length of time.

Any housing assistance program created by the Board may continue to exist until the Board determines to terminate said program. The Board may terminate said program at any time it considers termination advisable.

Procedures for implementing a housing assistance program will be developed by the Superintendent and approved by the Board.
